Gutta Percha & Absorbent Paper Points Booklet

© Copyright 2011 DiaDent Group International
www.diadent.co.kr

DiaDent Group International is a leading manufacturer and exporter of dental materials, consumable supplies, instruments and other dental products. DiaDent prides itself in its innovative products and outstanding customer service.

Specializing in Gutta Percha points and Paper Points, DiaDent carries the most extensive line of GP and PP in the market to suit your every need. Each point is hand rolled and is inspected by the Automated Laser Inspection Machine. Using laser beam, each DiaDent millimeter-marked point is individually inspected at D3 (3 mm mark) and D16 (16 mm mark) in diameter. Even though ISO and ADA standard diameter tolerance is only ± 0.05 mm, DiaDent's standard tolerance is ± 0.029 mm.

DiaDent's method of hand rolling the points ensures the following:

- Consistent and uniform taper
- Smooth, rounded, and bullet shaped tips
- Readily conforms to shape of the canal
- Optimal apical seal

DIADENT'S MILLIMETER MARKED GUTTA PERCHA & PAPER POINTS

- All DiaDent Points are Hand Jig Rolled to exacting standards.
- They are uniformly tapered and unsurpassed for consistency in sizing.
- All Points are laser inspected to ensure the tightest tolerances surpassing ISO standards.

● Millimeter Marked Gutta Percha Points

- Quick and easy method for depth measurements.
- Points with mm marking at 16mm, 18mm, 19mm, 20mm, 22mm and 24mm.
- Eliminates apex perforations which may lead to bleeding.
- Reaches the apex, completely seal the entire length of the canal.
- Save chair time with premeasured points.
- Most accurate depth measurements.

● Computerized Laser Inspection System

- Each point is inspected by the laser beam.
- Using a laser beam, each DiaDent ML.029 point is individually inspected for diameters at D3 and D16.
- ISO and ADA standard requires the use of 1/100mm incremental measurement units, DiaDent uses 1/1,000mm increments.

● Millimeter Marked Paper Points

- Quick and easy method for depth measurements.
- Points with mm marking at 18mm, 19mm, 20mm, 22mm and 24mm.
- Eliminates apex perforations which may lead to bleeding.
- Completely drying the entire length of the canal.
- Save chair time with premeasured points.
- Most accurate depth measurements.

● Hand Jig Rolled Points vs Machine Rolled Points

DiaDent's method of hand rolling the points ensures the following:

DiaDent Hand Jig Rolled Gutta Percha Points

- Consistent, Uniform taper
- Smooth, Rounded Bullet shaped tips
- Readily conforms to shape of canal
- Greater likelihood of optimal apical seal

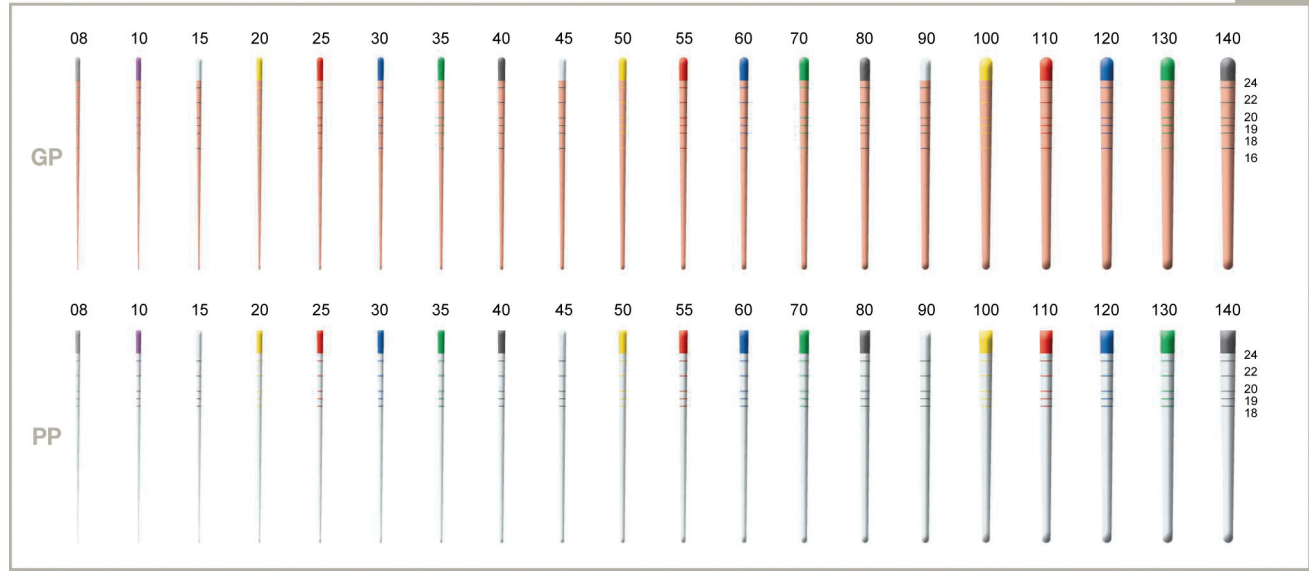

Machine Rolled Gutta Percha Points

- Inconsistent taper
- Uneven, Unpredictably shaped tips
- Overlapping of material of the tips
- Reduced likelihood of optimal apical seal

MILLIMETER MARKED GUTTA PERCHA POINTS & PAPER POINTS (ISO SIZES)

Millimeter Marked Type (ISO) (.02 TAPER)

- Millimeter Markings provide a quick and easy method for depth measurements
- Eliminates apex perforations which may lead to bleeding
- Superior absorbency ensures complete drying of the entire canal
- Save chair time with pre-measured points
- The +/- .029 diameter tolerance ensures an excellent fit to the files
- Cadmium free, latex free, radiopaque and hand rolled
- Each size is color coded (please refer to the chart on the right)
- **Also available in regular non-marked type**
